Subject: Call today? and some addition interpretation

Phil,

Are we having a call today? If so, when?

FYI: The USGS strategy team that consumed a lot of my time over the past several months had to submit a draft of our document yesterday. Thus, I now have more time to devote to this Bristol Bay exercise.

Along those lines, I threw a few slides together that summarize my review of porphyry copper tailings chemistry, as promised. Basically, these are just graphs showing the information in the spreadsheet that I sent out two weeks ago. I have also been playing with surface water data from the PLP web site. A few slides related to that are included.

Bob
